#### **Robert's Story**

Robert joined Leeds College of Technology from school in 2004 as a Level 2 Apprentice working at Complete Computer Systems Ltd. He successfully completed this within the year; then two years later completed a Level 3 Advanced Apprenticeship achieving Distinction grade in his BTEC. He was also rewarded with a UKSkills Gold Award after representing the College at the Hardware and Software Challenge held in Northumberland in June 2007.

Robert is currently working towards a Higher Apprenticeship and his responsibilities at Complete Computer Systems Ltd include training and developing new staff. Robert has entered another UKSkills Challenge for June 2008 and has invested in books to further his own learning in preparation for this event.

Having grown in confidence during the last 3 to 4 years, Robert shows a high level of motivation to succeed in his own career and will be delivering on-the-job training to another Apprentice due to start in his company in September 2008.

In June 2008 Robert won an award in his category in the West Yorkshire Adult Work-Based Learner Awards.
