## Leeds City College Technology Campus Hosts Print Networking Event

Leeds City College Technology Campus opened their doors to host their first highly successful Print Networking Event on 30<sup>th</sup> April 2009. The event, entitled "Meeting the Challenge" saw print companies from around the region attend the city centre premises to gain insight on business matters from training, funding and the latest technical innovations within the industry.

The College joined forces with key organisations including Polestar, Esko, Konica Minolta, Business Link, ixPressia, UPM Kymmene, Sun Chemical, Nordson and Manufacturing Advisory Service offering advice to over 50 print companies throughout Yorkshire in an effort to revitalise the industry and provide professional help and training where needed.

The event has received excellent feedback, including from Digital Solutions Consultant Martin Hill from Kodak who commented:

***'The event was very well organised and there were a lot of good people speaking. I liked the fact there was a wide range of topics and not targeted at one particular sector'***

With comments from companies at various ends of the business scale expressing such a high regard for the event, Leeds City College and its associates have reached a very high standard in the field of Print Networking and advisory services. The event has been a great success and will pave the way for future ones to push the boundaries of help and development in the print industry.
